

UGED1111H Exercise 1

Part 1 True or False Questions (8 marks)

Put “T” for true statements and “F” for false statements inside the bracket in response to each question. (2 marks for each)

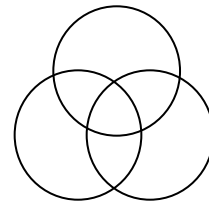

1. It is possible for an argument with all true premises and a false conclusion to be valid. ()
2. All the things that do not exist in the actual world are logically impossible. ()
3. An argument can be both invalid and sound. ()
4. The conclusion in a valid argument must be true. ()

Part 2 Use Venn diagrams to determine whether the following argument is valid or invalid. (3 marks)

1. No P are M.

No M are S.

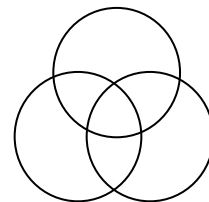

No S are P.

Part 3 Translate the following arguments into standard form categorical syllogisms and use Venn diagrams to determine whether each is valid or invalid. (14 marks; 7 marks for each)

1. Some cats do not eat fishes. No Whales eat fishes. Therefore, Some Cats are not Whales.
2. Unless a man is a musician, he is not an idealist. Nobody except composers is musicians. Therefore, it is not the case that there is no idealist who is not a composer.

1.

2.
